**HOUSTON, TX / July 29, 2008 / Business Wire /** – intraFUSION™, a Houston-based specialized physician practice management company, has received a strategic investment from Lake Capital to support the company's ongoing growth plans. intraFUSION provides turnkey management services to physicians who administer outpatient infusion therapies within their practice. From the initial set-up and staffing of the infusion center to billing, collections, materials management services, and more, this unique service allows doctors to practice medicine and focus more on patient care instead of running a business.

Founded in 1999, intraFUSION manages physician office-based infusion centers ("OICs") in 14 states. The company's management team is skilled and dedicated to serving its customers. Paul Provost, R.Ph., founded intraFUSION with a singular focus on providing the highest quality management service available for physicians. Carl Lampart, the company's CEO, brings over 18 years of experience in infusion therapy in both the home and OIC setting. The company's seasoned executives and strong client base position the company well for future growth opportunities.

"We have seen the demand for office-based infusion centers continue to grow. There are several additional attractive opportunities to serve our clients that we can pursue," said Provost. "With the investment and additional resources Lake Capital provides, we will be able to accelerate our plan to bring additional value-added services to our existing clients, including new areas of expertise, as well as pursue growth opportunities in our current and adjacent markets."

"intraFUSION has distinguished itself as a leader in physician practice management. We look forward to working with Paul and his team to continue to expand intraFUSION's reach and capabilities," said Tony Broglio, a principal at Lake Capital. "intraFUSION's client-focused approach and experienced management team has positioned the company to capitalize on growth opportunities while expanding their suite of service offerings."

### **About intraFUSION**

Headquartered in Houston, TX, intraFUSION provides the solution both for physicians and their patients who need outpatient intravenous therapy. As a single-source manager for all aspects of office-based infusion services, intraFUSION leads the way in outpatient infusion management by affording a higher level of patient care while creating a new source of revenue for physicians. More information about intraFUSION is available at [www.intrafusion.com](http://www.intrafusion.com).
